Full Eyeplan

The smart way to look after your eyes

CHALMERS OPTICIANS
Personal Eyecare

We all know how important it is to look after our eyes; after all, we only have one pair and they need to last our lifetime.

Full Eyeplan is a comprehensive eye care package designed to provide you with access to the very best of eye care at an affordable price.

Under **Full Eyeplan**, you are entitled to examinations as frequently as you need or want them. Just ask for an appointment.

What's more, we can open up a whole new world of innovative designer frames and lenses at excellent prices - as many as you want! Just look around the practice to see the savings!

here's how it **works**

- When you join **Full Eyeplan** you pay a small monthly subscription. This entitles you to full personalised Eyeplan eye examinations, designed to meet your eye care requirements and your lifestyle. This includes Optical Coherence Tomography (a 3D scan of the retina), visual fields via our Zeiss Humphrey analyser and DNEye scan of the eye - measuring optical aberrations of the eye to create the best optical performance of the lenses and also topography of the cornea.
- In addition, you are entitled to eye care as frequently as you require.
- We can separately offer you great prices on as many pairs of top quality spectacles and designer sunglasses as you want.
- What's more, any spectacles or sunglasses you buy are automatically covered under the Eyeplan Accidental Damage Scheme.

your **questions** answered

What does Full Eyeplan cost?

The small monthly subscription you pay depends on your own eye care needs. This is usually £10.00 per month or £8.00 if over 60 years.

When do the benefits start?

You're registered as soon as your first payment is made. We will provide your personal eye care programme - eye care whenever you need it. If you have a problem with vision or your eyes, don't delay, just come and have it checked out. You can then buy anything you need from us at our very special prices.

What's the damage cover all about?

Had an accident with your spectacles? No need to worry - we will look after you!

Any spectacles under two years old, covered by the Eyeplan Accidental Damage Scheme, will be repaired or replaced if you damage them accidentally. There is a small excess charge depending upon the nature of the damage and the age of the spectacles.
